

Hearts of Our Heroes

Once news of the COVID-19 pandemic started coming out in late February staff at Screven TASC started educating our individuals and families on ways to protect themselves and sending them information from the CDC with guidelines. On March 20, 2020 when we were notified that services would be suspended as of Monday March 23, 2020 at the center until further notice staff automatically switched into different roles without hesitation. Staff at Screven TASC have been phenomenal at adjusting to the ever-changing world we know live in from helping to get mask made, doing weekly wellness checks, going to individuals homes to take activity/learning packets, brainstorming new ways for us to improve the services we provide, and going out in the community doing yard contracts and cardboard contracts so that we keep the jobs our individuals love to do. Our customers have expressed their gratitude to staff for continuing to provide services during this time and we have even picked up a few new contracts during this time. Staff have also done a great job in redecorating and cleaning the facility. Even with everything going on our team has become stronger and has shown they can endure anything during these difficult times. I am so proud of every staff member at Screven TASC for stepping up to the challenges and coming together as a team during this time. We will continue to work as a team as uncertain times are still ahead of us providing the best services to our individuals and our community. I am truly grateful for each staff member at Screven TASC and the work they do! Great Job Ladies!!!

-Tasha Sterling
