

Hearts of Our Heroes

During COVID-19, Wendy Felix has been blowing up the phones with different vendors to help supply the clinics with masks, hand sanitizer, and extra gloves.

She has gone as far to help get toilet paper for employees that needed some at home. She is a very resourceful lady.

“I nominate Wendy Felix, LPN for the amazing job she did for getting us the PPE needed to keep us safe.”

-Sherry Vescuso, RN

Wendy Felix as the infection control/communicable disease specialist, is always looking out for our best interests as well as the persons served. During this pandemic, she has been relentless in looking for PPE for the staff to use in the agency. She made phone calls throughout the state to acquire PPE so we would have enough supplies to care for our persons served safely. When there was a case of COVID-19 with a staff member, she made phone calls to Augusta University to get everyone at risk tested. She even shopped on a weekend to find products to disinfect in the work place. -Lydia Daley
