

# Services

Mental health nurses have many responsibilities, including:

- **Assessments:** Mental health nurses assess mental health status.
- **Medication:** They administer psychiatric medications and monitor their effects.
- **Family support:** They offer support and education to families.
- **Advocacy:** They advocate for mental health needs and rights.
- **Care coordination:** They coordinate care with other healthcare professionals, such as psychiatrists, therapists, and Case Managers.
- **Education and prevention:** They promote wellbeing through education and prevention.
- **Liaison:** They serve as a liaison between individuals served, their families, and physicians.
